

RiskQual DataTrkWeb (DTW) Training

➤ Security

- All information entered (*SIRs, CCEs, Quality Improvement Studies, etc.*) is **highly protected**
- Event entries (*CCE/SIR*) will generate **HIPAA compliant email notifications**
- **Role-based permissions** – each staff member has a unique profile that only allows them access to certain information to their assigned site(s)
- Only certain users will be granted access to search and edit their site's events
- Helps **maintain our privilege**, where applicable – because of the role-based permissions, we are strictly following the **minimum necessary/need-to-know** portions of peer review law, and this also helps maintain our Attorney-Client Privilege if it has been invoked

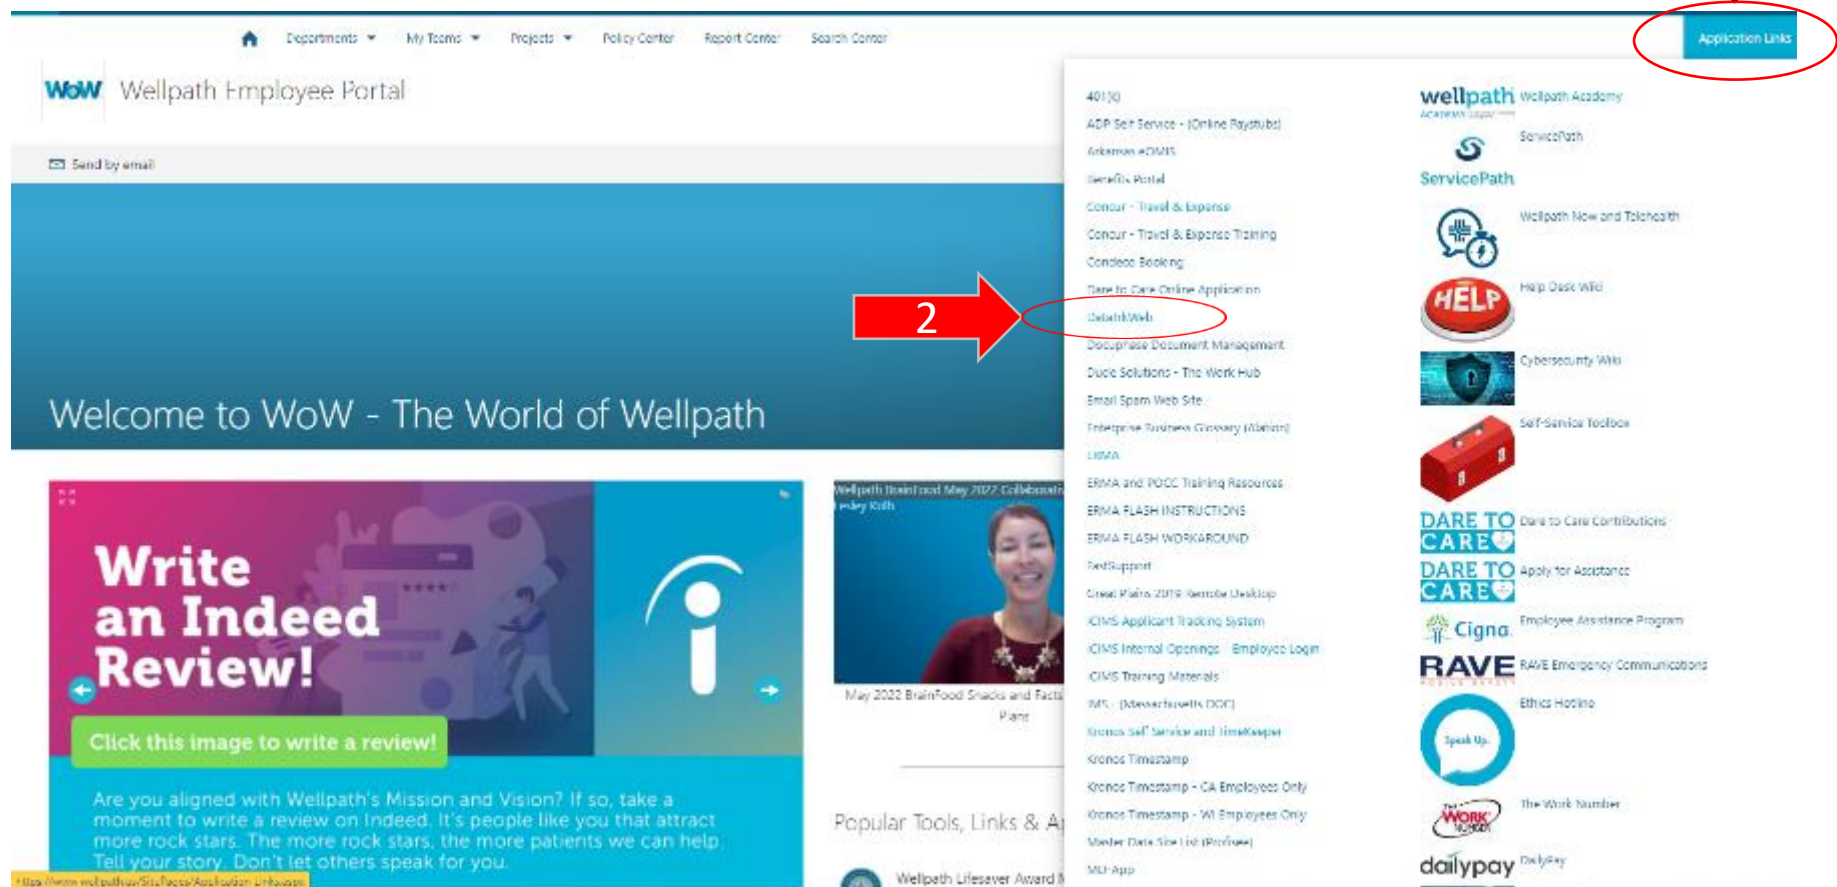

➤ Convenient & Easy-to-use

- For data entry, **DTW can be accessed from any computer**
- **No downloads or software required** to run the system/website
- DTW is **intuitive** and very **user friendly**

Accessing the System

- **Go to the WoW Page:**
<https://www.wellpath.us/SitePages/Home.aspx>
- Click on **Application Links** on the far-right corner and scroll down to **DataTrkWeb**, then click

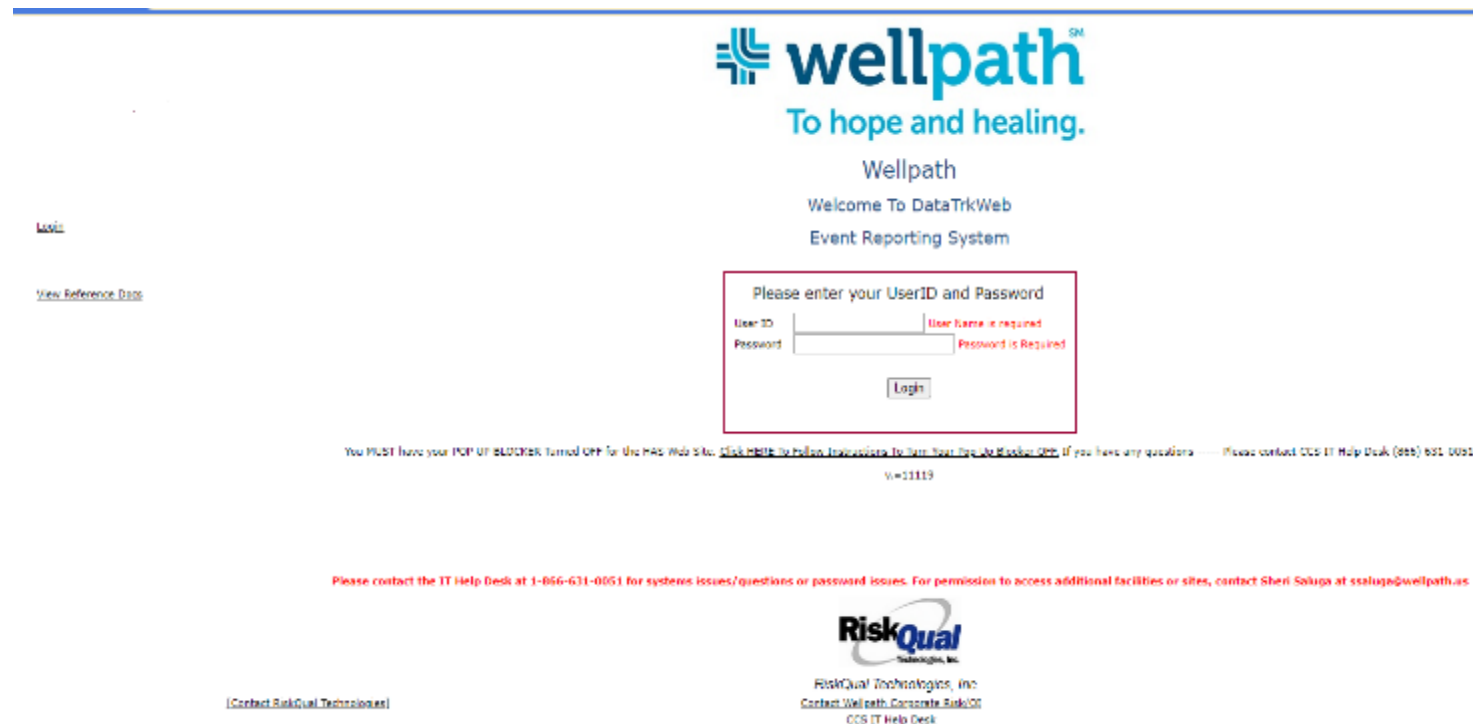

The screenshot shows the Wellpath Employee Portal (WoW) interface. At the top right, a red arrow labeled '1' points to the 'Application Links' button. Below this, a red arrow labeled '2' points to the 'DataTrkWeb' link in a dropdown menu. The main content area features a 'Welcome to WoW - The World of Wellpath' message, a 'Write an Indeed Review!' banner, and a 'Popular Tools, Links & A...' section. The right sidebar contains various service links including 'Wellpath Academy', 'ServicePath', 'Wellpath Now and Telehealth', 'HELP', 'Cybersecurity Wiki', 'Self-Service Toolbox', 'DARE TO CARE', 'Cigna', 'RAVE', 'Ethics Hotline', 'The Work Number', and 'dailypay'.

Accessing the System

Logging in:

- Enter your **User ID** and **Password** (*Use your **Wellpath credentials** to log in to RiskQual – the same used to access your computer, your email/Outlook, ERMA, etc.*)
- **If you experience log in issues:**
 - Ensure that you have not recently reset/changed your general Wellpath password
 - Check to see if you are having any issues accessing your other WP applications (*e.g., Outlook, ERMA, etc.*). If you are experiencing this issue in multiple areas/applications, contact the HelpDesk
 - If your credentials are working for all WP applications, except DTW, contact the Risk Manager (*or the person responsible for RiskQual reporting matters*) at your site and advise them of the issue

SIR Reporting (Event Type)

- Select the **Serious Incident Report (SIR)** from the Event Type dropdown menu and then click **New** (*most event entries will be an SIR*)*
- Refer to the **Data Dictionary** for events requiring SIR entry

*You only select **COVID-19 Positive** if you are reporting a positive Employee result (all WRS sites) or a positive Patient result (only for sites that do not use ERMA as their main electronic medical/health record, e.g., MCMHTF, NBH, SFSH, etc.)

SIR Reporting (Contract & Facility)

- Your **Contract** should **auto-populate** and then your Facility once you hit “**Next**” (*most sites only have one facility/campus for their Contract*)
- If not, choose your Contract (*Site*) from the dropdown list and click “**Next**,” and do the same for your Facility/Campus. If you have multiple Contracts and/or Facilities/Campuses, select the one that pertains to the event
- Your answers for these two question/fields pertain to Numbers 1-8 of the SIR entry

1. Contract

Wellpath -- TRAINING ONLY
Event Reporting System - TRAINING

Entry Type: Serious Incident Report (NEW)

Contract: 2025-FL-SOUTH FLORIDA STATE HOSPITAL

2. Facility

Wellpath -- TRAINING ONLY
Event Reporting System - TRAINING

Entry Type: Serious Incident Report (NEW)

Facility: 2025-FL-SOUTH FLORIDA STATE HOSPITAL

SIR Reporting (Person Involved Details)

Person Involved Details:

- **Event involves multiple patients?** Answer “Yes” if the incident involves **more than one patient** (*e.g., R/R Assault, etc.*)
- If **only one patient** is involved in the incident being reported, then select “No” (*e.g., Medical Resident Emergency*)
- **Event involves multiple staff members?** This question more than likely will be “Yes,” most events will involve multiple staff members from various departments observing and/or responding to an incident

SIR Reporting

(Primary Person/Patient Involved Details)

Primary Person/Patient Involved Details:

- **Any** incident involving a patient, the Primary Person Type is **PATIENT**
 - For most events the Primary Person will be a patient
- You should only be selecting **EMPLOYEE** (or other listed Person Types) as the Primary Person Type if it is an event that **only involves staff** (or that Person Type and Staff)
 - **EXAMPLE:** Staff member experiences chest pains during their shift. A medical code is called and they are sent out via EMS
 - No patients were involved in the above scenario
 - The same steps would apply for a similar type situation occurring to a Vendor, Visitor, Volunteer, Contractor, etc.
- **SITE/FACILITY** would be selected for events such as **natural disasters, power outages**, etc.

To hope and healing.

SIR Reporting

(Primary Person/Patient Involved Details)

Primary Person Name Involved:

- All names can be searched by the individual's last name (*there are other search values available, but this is the easiest*)
- All patient and employee names should be discoverable in your search
 - If you enter a patient's last name with its correct spelling and the patient does not appear, do **NOT** click on the “Add Patient” button, **unless** you have been instructed to do so by your Supervisor or RiskQual instructor.
 - Instead, enter the name of the other party involved for the time being and then send an email notice to your site's Risk Manager (*or the individual in charge of your site's RiskQual reporting matters*), cc'ing your Department Director, re: the missing name so that they can address this matter with RiskQual's Support Team (*this instruction also applies for Employee Names. See Slide 14 for further details*)

The screenshot displays the Wellpath Event Reporting System interface. The top header includes the Wellpath logo, the text "Wellpath -- TRAINING ONLY", and the user name "Hello TRAINCCRS 1 USER". The main section is titled "Event Reporting System -- TRAINING". On the left, there is a sidebar with a list of questions and responses, including "Primary Patient Involved SEARCH". The main content area shows the "Entry Type: Serious Incident Report (NEW)" and a search form for "Primary Patient Involved SEARCH". The search form includes a "Select Field" dropdown set to "Patient Name" and a "Value" input field containing "smith". A red arrow points to the "Search" button. Below the search form, it indicates "2 (s) Records Found." and displays a table of results:

Patient ID	Med Rec Number	Patient Name	Admit Date
W93400	54234	Smith, William	01/01/1900
12345678	12345	Smith, John	01/01/1900

Below the table, there is a "Please Select a page number to view more records" message and "Previous" and "Next" buttons. At the bottom, there is a note: "Ex: Enter Last Name of PRIMARY Patient Involved & Click SEARCH - if NOT FOUND - Click ADD PATIENT to enter the new patient record. Highlight the Patient to Select -- IF Patient NOT FOUND on the list, Click ADD PATIENT button To Add Patient."

SIR Reporting

(Primary Person/Patient Involved Details)

If you do need to add a Patient manually:

- Click on the “**Add Patient**” button
- You will be required to enter the following 6 fields before saving:
 1. **First Name**
 2. **Last Name**
 3. **Date of Birth**
 4. **Admit Date** (*and/or in some cases this is referred to as the **Intake Date***)
 5. **Med Rec Number** (*and/or in some cases this referred to as the **Booking #***)
 6. **Patient ID** (*and/or in some cases this is the **Inmate #***)
- Make sure that all information manually entered is correct so that Duplicate patient profiles are not created if and when RiskQual interfaces with ERMA
- Click on the “**Save Patient**” button

The screenshot displays the 'Wellpath -- TRAINING ONLY' interface. The header includes the Wellpath logo, the text 'To hope and healing.', and 'Event Reporting System -- TRAINING'. The main content area is titled 'Entry Type: Serious Incident Report (NEW)' and 'Add New Patient'. Below this, there is a form with several fields: 'Person Type' (dropdown), 'Admit Date (mm/dd/yyyy)' (text), 'Gender' (dropdown), 'Med Rec Number' (dropdown), 'First Name' (text), 'Last Name' (text), 'Address' (text), 'Address Type' (dropdown), 'City' (text), 'State' (text), and 'Zip' (text). There are also fields for 'Patient ID' and 'Inmate #'. The form is designed for manual entry of patient information.

SIR Reporting

(Primary Person/Patient Involved Details)

Primary Person Name Involved (cont.):

- **Select the correct patient name** from the dropdown list resulting from your search
- If the patient has **multiple profiles** in the system, **select the patient profile with the last Admit Date and/or the correct identifying information** (e.g., correct DOB, Med Record#, Patient ID#, etc). The patient's information will automatically populate in question/fields 13-24 upon selection
- In an altercation involving two patients, the Primary Person Name should be that of the **identified aggressor** because this is the person that will most likely be featured in the SIR because they are receiving the most interventions/treatment/staff response
- The only time the patient victim of an altercation should be considered the Primary Person Name is if **the victim's injuries are severe enough to require ER trip/transfer** because now the focus of the event and interventions has changed
 - This recommendation may change – The Risk Manager or your Administrator will notify you if this occurs

Primary Patient Involved SEARCH

Additional Party Directly Involved?

* Required

☒ Yes ☐ No

Prev Next

Ex: Is There An Additional Party Directly Involved In The Event (Y/N)?

■ Secondary Person/Patient Involved

- In an **altercation involving 2 Patients**, the patient **victim** of the assault would be named as the **secondary party** (*unless it is the situation identified previously where the victim requires emergency medical treatment due to their level of injury – See Slide 12 for further details*)
- In an altercation where the Patient attacked a Staff member, the **staff victim** should always be the **Secondary Person Involved, regardless of the level of injury** (*identifying the patient aggressor as the Primary Party makes it easier for the site to track all the incidents this patient has been involved in and has initiated in order to determine trends re: patient's behavior as well as appropriate interventions to prevent future incidents*)
- When an **incident involves solely 1 patient** (e.g., *Self-Harm*), select for **Secondary Party** the **staff member** that first responded to the incident (e.g., *MHT who observed Pt self-injuring*) or the staff member most involved in the response (e.g., *the unit nurse who administered medication, contacted the provider for a restraint order, etc.*)
- If you are unable to find the Staff member's name in the Staff Search do **NOT** click on “**Add Employee**” button, **unless** you have been instructed to do so by your Supervisor or RiskQual instructor. Instead, select the name of another staff member involved in the event for the time being and send an email notice to the Risk Manager (*or the individual in charge of your site's RiskQual reporting matters*) of the missing employee name so they can address this issue with RiskQual Support. Remember to cc your Department Head on this email notification

SIR Reporting

(Event Type & Subtype – Data Dictionary)

- For a list of all the current **Event Types and Event Subtype** found in RiskQual refer to the **Data Dictionary**
 - Should be provided to you by your site's RiskQual Trainer
 - Can be found by clicking the “**View Ref Documents**” in RiskQual DTW home screen
- Definitions and Risk Severity Assignment Levels** are included
- If the Event Type is listed in the Data Dictionary, then the event meets criteria for SIR entry
- If unsure which Event Type to choose, select the Event Type that has the description with the closest match to the current incident and notify the Risk Manager (*or the person responsible for RiskQual reporting matters at your site*)

WRS DTW Data Dictionary				
Parent Code	Code	Code Description	Event Description	Severity Level
ABUSE	S/RABUSE	Staff/Res. Abuse (observed)	Staff member's behavior towards or treatment of a resident is abusive in nature (e.g. use of abusive or threatening language towards the Resident; intimidating the Resident; sexual innuendo; extorting the resident; etc.). * NOTE : This does not include the use of physical force against a Resident refer to ASSAULT; BATTERY & USE of FORCE for reporting purposes.	2
ABUSE	R/RABUSE	Res./Res. Abuse	Resident's behavior towards or treatment of another resident has proven to have been abusive in nature (e.g. use of abusive or threatening language towards the resident; intimidating the resident; extorting the resident; etc.).	2
ABUSE	R/RALLEGAT	Res./Res. Abuse /Allegation	Resident lodges a verbal allegation or notifies the Abuse Hot Line that another resident has abused him/her.	2
ABUSE	S/RALLEGAT	Staff/Res. Abuse /Allegation	Resident lodges a verbal allegation or notifies the Abuse Hot Line that a staff member has abused him/her	2
AGGRESSION	R/RLANGUAG	Abusive/Obscene Language - Res/Res.	Resident directs abusive or obscene language towards another resident which causes a disruption of the orderly operation of the facility.	3
AGGRESSION	R/RTHRTGES	Threatening Gesture - Res/Res.	Resident makes a gesture towards another resident which implies/appears as though s/he is going to physically harm them (e.g. fakes a punch; lunges towards the person; acts-out a stabbing motion; simulates a choking action, simulates cutting the person, simulates shooting the person; etc.).	3
AGGRESSION	R/RVERBAL	Verbal Threat - Res/Res.	Resident issues a verbal threat to do bodily harm or threatens to engage in any act that would seriously adversely affect another resident.	3

SIR Reporting (Event Description)

- The **Event Description** is one of the **most important** areas of the SIR
- When completing the Event Description, aka Narrative, it should include all the information pertaining to the incident, specifically those of the required fields (*e.g., party name, date, time, etc.*)

Ex: Enter detail description of the event

■ The Event Description:

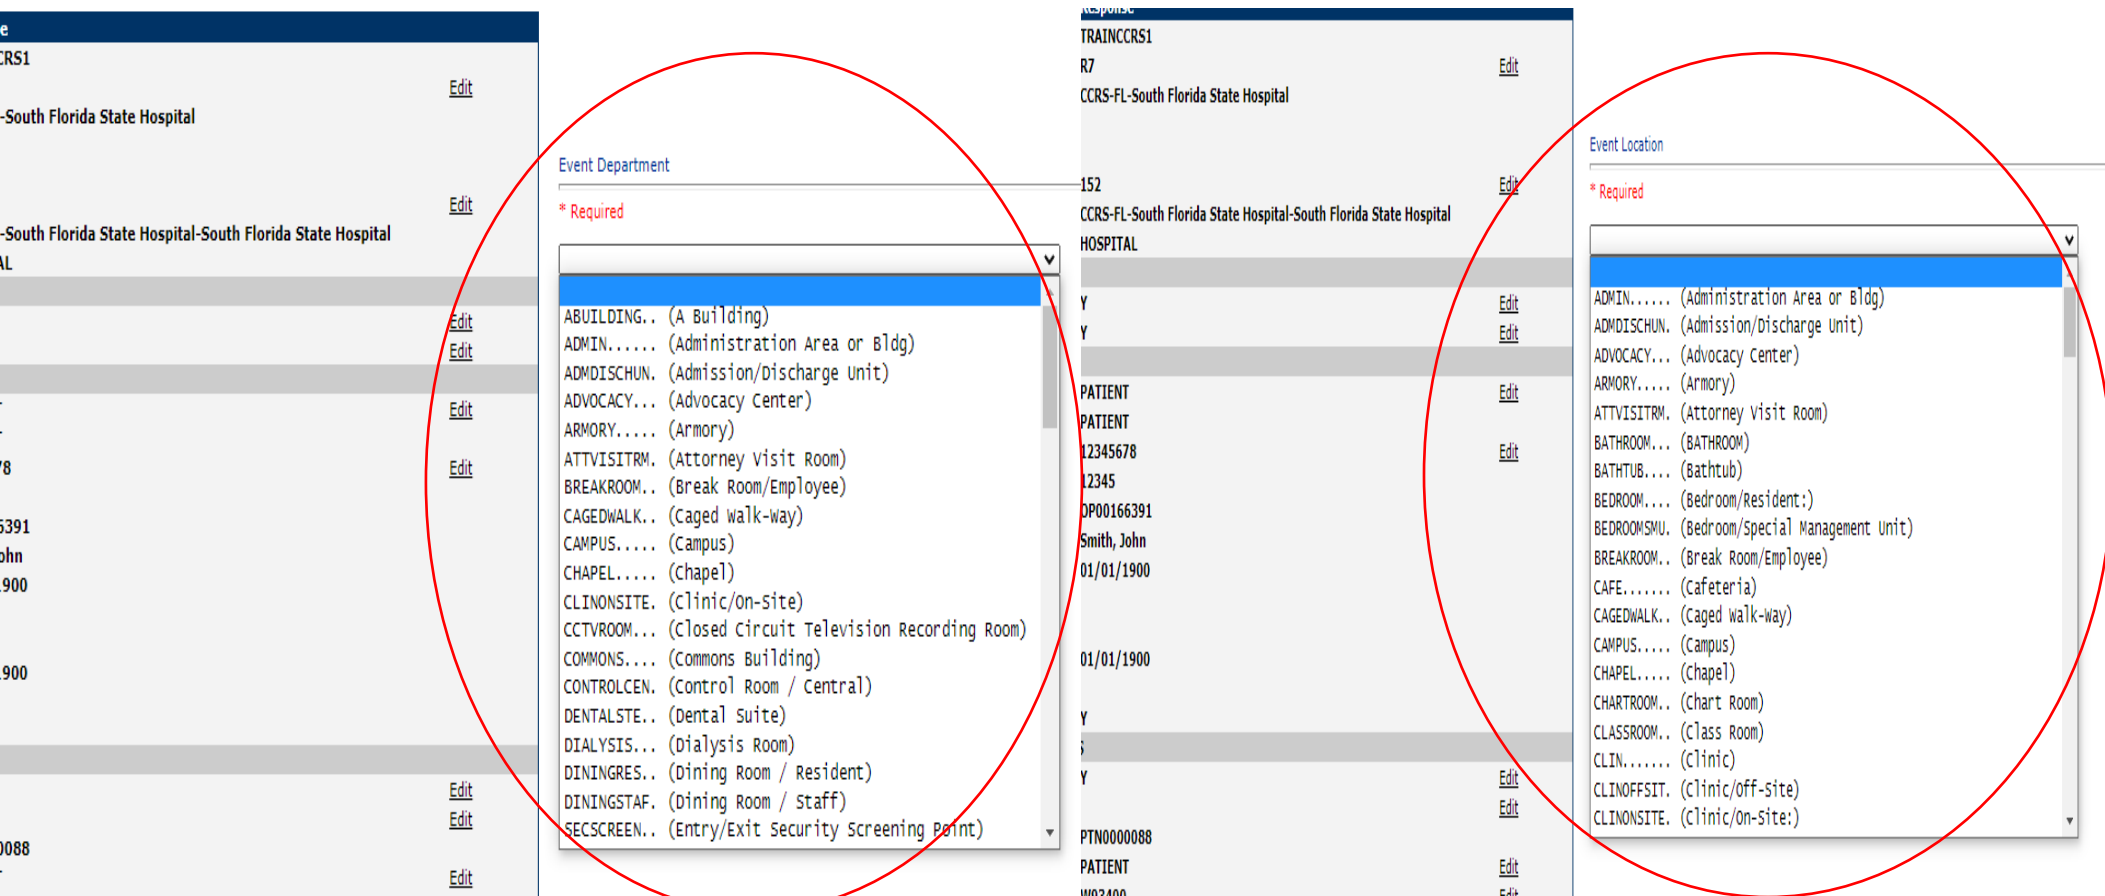

- **Must be comprehensive**
 - ✓ Should be descriptive of the facts
 - ✓ Should not include opinions
- Should be a **summary of all incident/staff reports** received
- Should include in its body **all the answers to the required SIR question fields**
- **Should answer:**
 - ✓ **Who?**
 - ✓ **What?**
 - ✓ **When?**
 - ✓ **Where?**
 - ✓ **AND** whenever possible – **How? & Why?**
- Should detail the incident, including the staff response and intervention
EXAMPLES OF STAFF RESPONSE would include mention and elaboration of the following:
 - ✓ **Medication Administration** (*e.g., ETO, IMO, PRN, etc.*)
 - ✓ **Restraint Applied** (*e.g., manual hold, restraint chair, etc.*)
 - ✓ **Assessment of the Patient**
 - ✓ **De-escalation interventions** (*e.g., guided to Quiet Room or Comfort Room*)
 - ✓ **Debriefing with the Treatment Team**
 - ✓ **Referral to the clinic**

SAMPLE SIR Event Description:

“On 10/1/2021 at approximately 1400hrs, Patient John Smith was sitting in the Blue Unit common area when he was physically attacked by Patient Michael White; Pt White punched Pt Smith in the face and pushed him down to the floor. Unit Nurse Cheryl Jones called a code for Aggressive Event over the radio. Patient Safety Officers Eric Johnson and Mark Williams responded to the call for assistance, separating the two patients and physically redirecting the aggressor away from Pt Smith; a manual hold was ordered by Dr. Jane Richardson and administered by PSO’s Johnson and Williams from 1402-1404hrs for safety reasons. Pt White agreed to return to his room for de-escalation. While Officers were redirecting Pt White, Pt Smith was attended to by RN Jones who assessed him for injuries. A laceration was noted on Pt Smith’s right eyebrow. First aid was administered by RN Jones. Pt Smith denied any other pain/injury but admitted to feeling light-headed and dizzy. RN Jones referred Pt Smith to the clinic for further assessment/treatment. He was escorted to the clinic by PSO Johnson at approximately 1410hrs. Pt Smith was assessed and treated by Dr. Joseph Brown; wound adhesive was applied to the laceration. Dr. Brown ordered that Pt Smith be transported to Jackson Hospital for further evaluation/treatment. RN Jones completed a face-to-face assessment of Pt White at approximately 1430hrs; no injuries were noted and/or reported at the time of assessment. Debriefing with Pt White revealed that he had struck Pt Smith because he was experiencing voices telling him Pt Smith wanted to hurt him. Pt White reported that he was still experiencing auditory hallucinations, though he was trying to ignore them. RN Jones contacted Dr. Richardson shortly after to discuss Pt White’s presentation. Dr. Richardson ordered an Emergency Treatment Order (ETO) of Ativan 2mg IM, Haldol 10mg IM, and Benadryl 50mg IM for Pt White for agitation and psychosis. ETO was administered by RN Jones at approximately 1447hrs. As per RN Jones, Pt tolerated medication well. He was observed by Mental Health Technician Terry Adams sleeping in his room during face check at approximately 1515hrs. Unit staff will continue to monitor Pt White. Pt Smith was transported to Jackson Hospital by PSOs Andy Anderson and Beatriz Walker; they exited the facility at approximately 1530hrs. Treatment Team notified of the incident.”

SIR Reporting (Event Department)

- Select the **Event Department** from the dropdown list
 - This is the **Unit or Facility Area** in which the incident occurred (*e.g., Unit 3, Vizcaya, Lakes, Alamo, Administration, Gym, Library, etc.*)
- Select the **Event Location** from the dropdown list
 - This is the **specific location on the unit or facility area** in which the incident occurred (*e.g., Resident Bedroom, Day Room, Quiet Room, Shower, etc.*)

The screenshot displays the SIR Reporting form with two dropdown menus highlighted by red circles. The left circle highlights the 'Event Department' dropdown, which lists various units and facility areas. The right circle highlights the 'Event Location' dropdown, which lists specific locations within those units.

Medication Questions (cont.)

▪ When answering Medication Question Details, if you are:

• Nursing/Medical Users/Reporters

- Review the EMR and please complete the information accordingly
- If you cannot find a listed medication when entering a Formulary Medication, please pick another medication given to the patient or select Non-Formulary Medication for the time being and notify the Risk Manager (*or person in charge of RiskQual matters at your site*), cc'ing your Director, on the missing medication so we can address the issue with RiskQual Support

• Non-Medical Users/Reporters* (*e.g., Captains, Security Supervisors, etc.*)

- Review the reports from Nursing addressing the medication orders and administration
- Discuss any questions or concerns with the appropriate party from the Nursing Dept (*e.g., Nursing Supervisor, Nurse Manager, Charge Nurse, Unit Nurse, etc.*).
- **IF** you cannot obtain the medication information in time to submit your SIR, answer **“No”** for the **“Medications Involved?”** Then, email the Risk Manager, cc'ing your Director, on the missing medication information and any issues re: entering these details (*e.g., could not obtain information from the Nurse in time to submit the SIR before the end of shift, medication name was missing from search, etc*)

***IMPORTANT NOTE** – It is advised that sites have Medical/Nursing staff entering events involving Medical Events, medical interventions, etc., whenever possible. If your site does not have Nursing and/or Medical Staff reporters, be sure that your RiskQual reporters have regular communication with Nursing/Medical Staff to verify information.

SIR Reporting

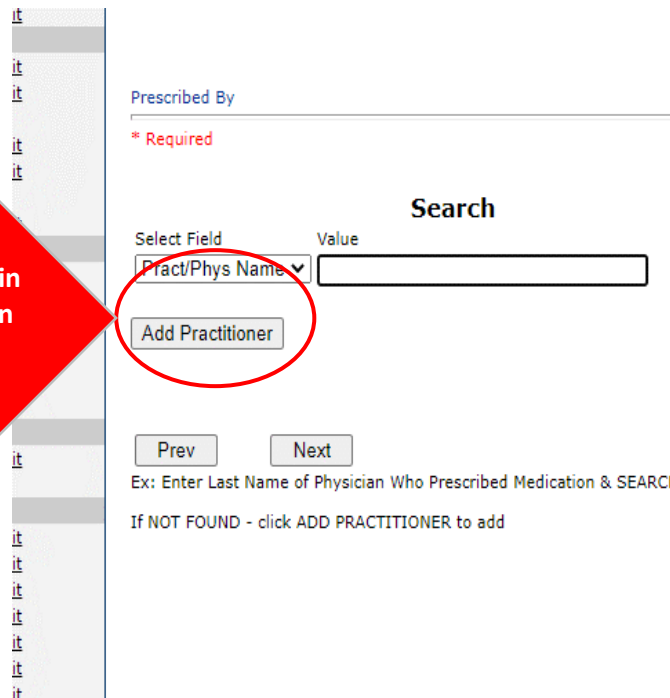

(Action Taken Details – Medications Involved)

■ Practitioner/Physician Name

- If you cannot find a Physician name in the system, click on the “**Add Practitioner**” button and fill in only the required fields – **Practitioner First Name, Last Name, and ID Number** – if you do not have this information – notify the Risk Manager (*or person in charge of RiskQual matters at your site*), cc'ing your Director on the email
- This is the **ONLY** time you are encouraged to click on the add button (*Practitioner names do not automatically populate from Kronos into this field in RiskQual – we are aware that they need to be manually entered*)
- Once the Practitioner/Physician profile has been saved, it will be available for selection in future searches

Practitioner Information

■ Restraint Details – Restraint Used?

- Choose “**Yes**” if the person was restrained manually (*e.g., manual hold*) or mechanically (*e.g., restraint chair, 4-point restraint, etc*) and a doctor’s order was required for the application of the restraint (*in some cases order will be obtained prior to application, while in other instances order will be obtained retroactively*)
- Choose “**No**” if no restraint was applied/needed **OR** if there was a **Use of Force**
 - Use of Force responses are for volitional behaviors on the part of the patient/resident, not for behaviors caused by mental illness
 - Use of Force do not require a doctor’s order
 - Use of Force has its own set of SIR questions
 - Most hospitals will not be able to choose Use of Force and/or will not have access to those questions because of the characteristics of the population they are serving (*e.g., mentally ill, requiring a doctor’s order*)

The screenshot displays the 'Restraint Used?' section of the SIR Reporting interface. On the left, there is a vertical sidebar with multiple 'Edit' links. The main content area features a box with three links: 'Click Here to add Follow Up Details', 'Click Here to add Additional Parties Involved', and 'Click Here to add Additional Witnesses'. Below this, the 'Restraint Used?' label is followed by a red asterisk and the word 'Required'. A dropdown menu is open, showing three options: 'YES..... (YES)' (selected), 'NO..... (No)', and 'YES..... (YES)'. The text 'manual hold)?' is partially visible to the right of the dropdown.

■ Restraint Details – Restraint Type

- Select the correct **Restraint Type** from the dropdown menu options
- You will be required to answer the following restraint details:
 - **Restraint Start Time** (*military format*)
 - **Restraint End Time** (*military format*)
 - **Employee Requesting Restraint Order** (*will usually be the attending/unit nurse*)
 - **Restraint Ordered by** (*will be the Practitioner/Physician providing the order – Add Practitioner if not located in search dropdown list – see Slide 26 for further details on this process*)
 - **Restraint Applied by** (*will usually be a staff member from your Security/Safety Dept, but can be any trained staff member implementing the restraint*)
 - **Family Contacted?** (*some sites are required to obtain consent and contact information from the patient/resident upon their admission re: who to notify if they are restrained*)
 - **Face to Face Evaluation Conducted by** (*will usually be the attending RN*)
 - **Face-to-Face Evaluation Time** (*military time*)(*best practice – should be conducted within 60 minutes of restraint to check for signs of physical/medical distress/injury in response to event. Refer to site protocols/policies for specifics on timeframes*)

■ Use of Force (UoF) Details

- **Use of Force** is an intervention implemented usually in the following treatment settings:
 - **Civil Commitment Centers**
 - **Jail-Based Competency Treatment (JBCT) Programs**
 - **Some hospitals** in specific unit areas based on the patient/resident population unique characteristics
- It is **not** an available option for all sites
- For sites that utilize UoF, you will be required to answer the following UoF details:
 - **Use of Force?** Yes/No
 - **Use of Force Type** – Select from available dropdown list menu

 - REGULAR... (Regular (30 minute checks))
- Medical assessment completed for patient/resident?**
 - * Required
 - ☒ Yes ☐ No ☐ NA
 - Prev Next
 - Ex: Was Medical assessment completed for patient/resident?

■ Other Important Event Details include (cont.):

• Treatment/Injury Type (Patient/Resident)

- Select from the dropdown list the type of Treatment/Injury the patient/resident received/sustained during the event
 - ✓ Do **NOT** select “**DEATH**” (*for any event resulting in Death, a separate SIR will need to be entered w/DeathExpected or DeathUnexpected as the Event Type*)
 - ✓ Select “**NA**” if no injury was sustained
 - ✓ Select “**OFFSITEER**” if patient was transported to a nearby Emergency Room
 - ✓ Select “**OFFSITEIN**” if you have confirmed that the patient was admitted to the hospital
 - ✓ Select “**ONSITETX**” if all treatment provided occurred at the site

The screenshot displays a web application interface for SIR Reporting. On the left, a vertical list of 'Edit' buttons is visible. The main area shows a form titled 'Treatment/Injury type' with a red asterisk indicating it is required. A dropdown menu is open, showing the following options: 'ONSITETX... (Onsite TX)' (selected), 'DEATH..... (Death (Expired))', 'NA..... (None)', 'OFFSITEER.. (Offsite ER (Transported))', and 'OFFSITEIN.. (Offsite In (Admitted))'.

SIR Reporting (Other Event Details – Staff Assessment, Treatment/Injury, & Worker's Comp)

Other Important Event Details include (cont.):

Medical assessment completed for staff?

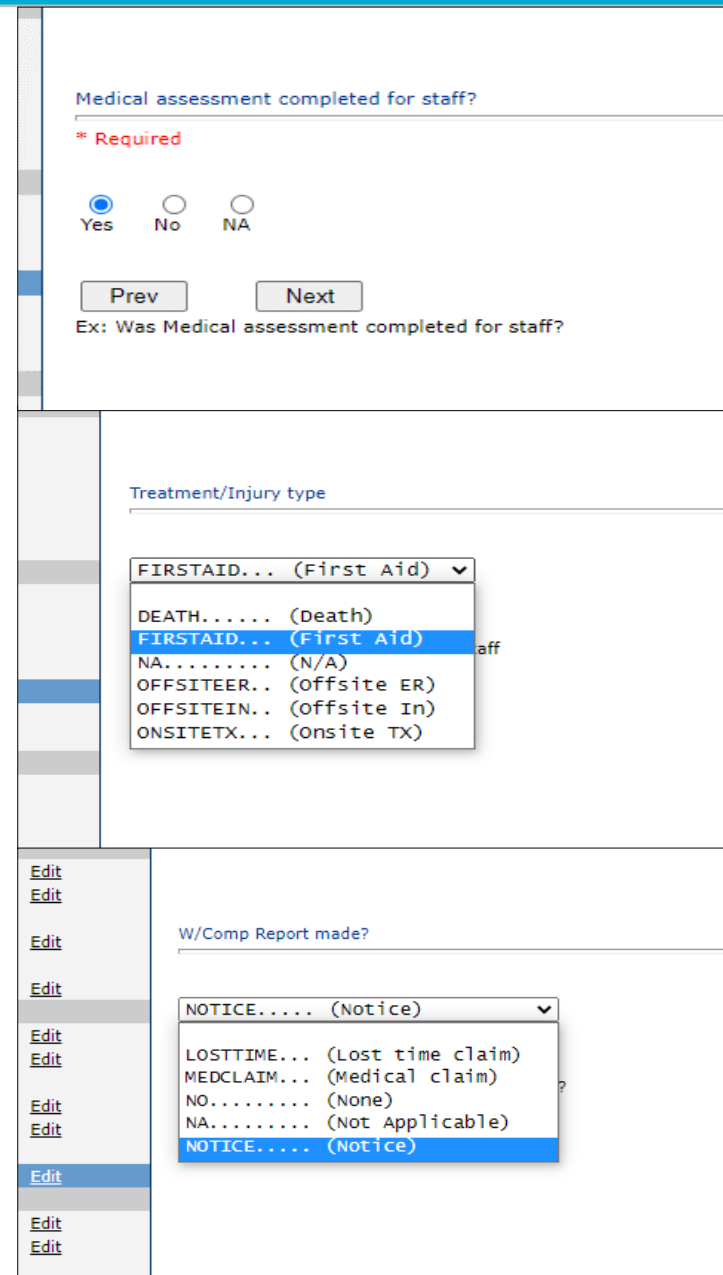

- Select **Yes** if the staff was assessed at the site, including assessment to rule out injury
- Select **No** if the staff needed to be assessed, but was not
- Select **NA** if during the event the staff was not injured and/or at risk of sustaining an injury

Treatment/Injury Type (Staff)

- Select from the dropdown list the type of Treatment/Injury the staff member received/sustained during the event
 - ✓ Same instructions for Treatment/Injury options for patient/resident apply to staff ([see Slide 32 for details](#))
 - ✓ The dropdown menu for staff includes “**FIRSTAID**” as an extra option. Select this option if the staff member only received First Aid at the site in response to this incident ([select **ONSITETX** if the staff member received treatment at the site beyond that of First Aid](#))

W/Comp Report made?

- Avoid selecting “**NO** (None)”
- Instead select:
 - ✓ “**NA** (Not Applicable)” if the incident would not have risked the staff to injury
 - ✓ “**NOTICE**” if the incident would have risked the staff to injury, but staff did not sustain any injury and/or require any treatment
 - ✓ “**MEDCLAIM**” if the incident resulted in injury and the staff needed to be seen for treatment at an outside clinic or hospital

SIR Reporting (Other Event Details – Witness Involved Details)

■ Witness Involved Details include:

• Was Event Witnessed?

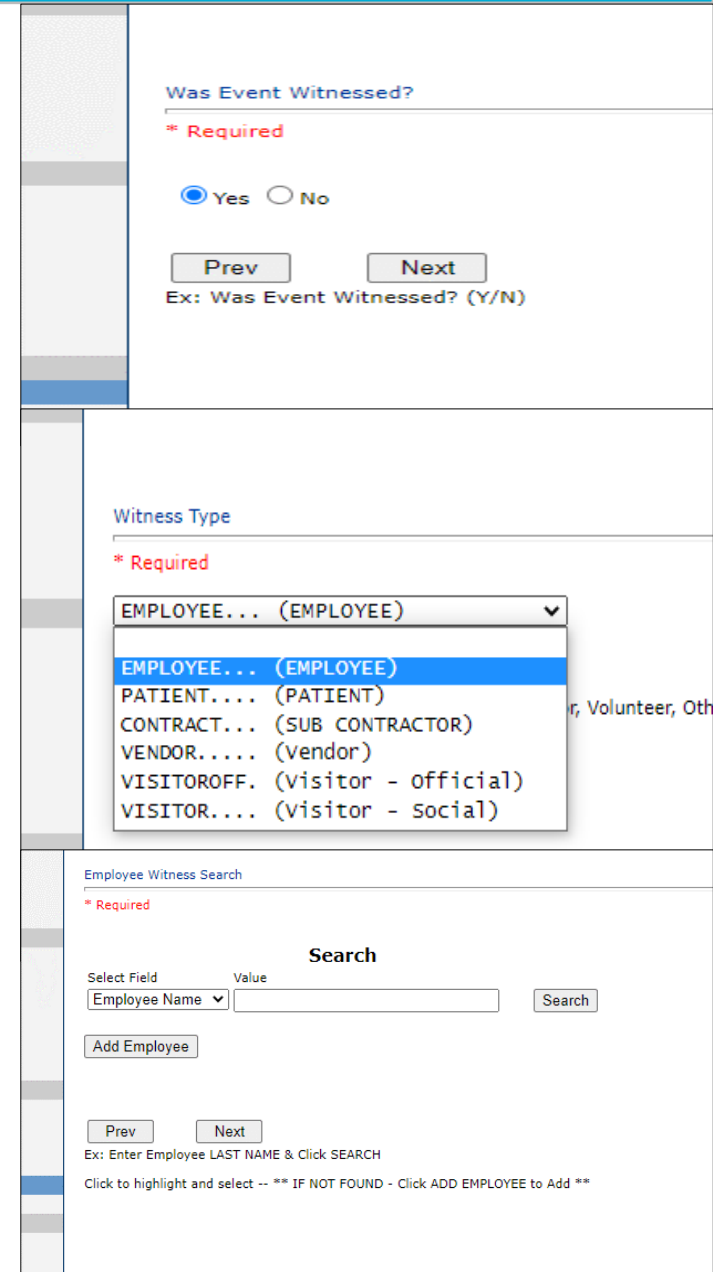

- You should rarely answer “**No**” to this question – there should not be incidents occurring at the site regularly that go unwitnessed, especially in patient/resident common areas where most incidents occur

• Witness Type

- Your witness type should always be an Employee
 - ✓ Employees should be regularly present during incidents, especially ones that have occurred in patient/resident common areas to prevent and/or intervene
 - ✓ Patients are not considered reliable witnesses
- Whenever possible avoid using as your Employee Witness a party directly involved in the incident

• Employee Witness Search

- Search for your Employee witness the same way you would search for an Employee name in previous fields (*see [Slides 10 & 14](#) for details on searching for Employee names*)

The screenshot displays the 'Witness Involved Details' section of the SIR Reporting interface. It includes three main input areas:

- Was Event Witnessed?**: A required field with radio buttons for 'Yes' (selected) and 'No'. Below the buttons are 'Prev' and 'Next' navigation buttons. An example text reads: 'Ex: Was Event Witnessed? (Y/N)'.
- Witness Type**: A required dropdown menu. The dropdown is open, showing a list of options: 'EMPLOYEE... (EMPLOYEE)' (highlighted), 'PATIENT... (PATIENT)', 'CONTRACT... (SUB CONTRACTOR)', 'VENDOR.... (Vendor)', 'VISITOROFF. (visitor - official)', and 'VISITOR.... (visitor - Social)'. To the right of the dropdown, the text 'r, Volunteer, Oth' is partially visible.
- Employee Witness Search**: A required search section. It features a 'Search' header, a 'Select Field' dropdown set to 'Employee Name', and a 'Value' input field. A 'Search' button is to the right of the input field. Below the search field is an 'Add Employee' button. At the bottom, there are 'Prev' and 'Next' navigation buttons. A note below the buttons reads: 'Ex: Enter Employee LAST NAME & Click SEARCH'. A footer note states: 'Click to highlight and select -- ** IF NOT FOUND - Click ADD EMPLOYEE to Add **'.

SIR Reporting (Other Event Details – Notification Details)

- Be familiar with your site's specific policies and requirements on agency and/or client notifications, including timeframes
- Be sure to notify the necessary parties of specific events in a timely manner
- **Notification Details Include:**
 - **Client Representative Notified?**
 - If a representative was notified, select from the dropdown list of client/agency representatives specific to your site
 - If no representative was notified, select **"No"** from the dropdown list
 - If the client/agency notified is not listed, select **"OTHER"** from the dropdown list
 - **Representative Notified**
 - Enter manually the name of the representative and the name of the agency they represent in the next field, especially if you selected **"OTHER"**
 - **Notification Date**
 - Select date representative was notified of event from calendar
 - **Notification Time** (military format)
 - Select time the notification was made to the representative on the aforementioned date

Client's representative notified?

SIR Reporting

(Other Information Details)

■ Other Information Details include:

- **Lock down?** - No, Partial, Total (*select from dropdown*)
- **Evacuated?** – No, Partial, Total (*select from dropdown*)
- **Property damaged?** (*select from dropdown – do your best to estimate the cost of the damage, if there was any*)
 - No
 - Yes < \$1000
 - Yes >= \$1000
- **Law Enforcement Notified?**
 - Select “**Yes**” if they were
 - Select “**No**” if they were not, but should have been notified
 - Select “**NA**” if the event does not call for Law Enforcement notification and/or intervention
- **Media Involved?**
 - Select “**Yes**” if this event was covered in the media (e.g., local or national news outlet, etc). This includes awareness of social media communications and/or posts involving the incident
- **Recording of the Event?**
 - Will almost always be “**Yes**,” unless there is a camera malfunction or it occurs in a known blindspot (*e.g., resident bedroom*)
- **Type of Recording**
 - Will most times be **CCTV**, especially in patient/resident common areas
 - **HANDHELD** should be selected when a handheld video camera was used in the recording, especially in the site’s CCTV blindspots (*e.g., patient bedroom when patient is receiving an ETO*)
 - **STILLPHOTO** can be selected when photo documenting with a camera (e.g., pictures of a resident room where contraband was found; pictures of a patient’s injury following an event or treatment intervention)

■ Other Information Details include:

- **Treatment Team notified? Yes/No**

- There should always be attempts to notify the Treatment Team of a patient event, especially during business hours
- Answer “**Yes**” if a Treatment Team member:
 - ✓ Was notified in person, by phone, or by email
 - ✓ Was present during the event
 - ✓ Provided treatment/intervention to the patient after the event

- **Did Patient Debriefing occur? Yes/No**

- There should always be attempts by the staff to debrief with the patient/resident in order to:
 - ✓ Find out the reasons why the patient/resident was behaving in this manner or why the event occurred
 - ✓ Educate the patient/resident on interventions and/or treatment provided
 - ✓ De-escalate the patient/resident if they are still upset or agitated
- Patient/Resident debriefing will not always be possible, especially right after the incident, because the patient/resident’s emotional/mental status may prevent them from properly participating in the debriefing with staff or patient/resident may have needed to be transported to another setting. Examples of the above include:
 - ✓ Patient is actively psychotic and responding to auditory stimuli
 - ✓ Resident remains agitated and refuses to speak to staff
 - ✓ Person served was transported to local ER for treatment of his injuries

- **Did Staff Debriefing occur? Yes/No**

- Staff should always try their best to debrief following an event in order to ensure that:
 - ✓ All protocols/procedures were followed
 - ✓ All necessary parties were notified/informed of the event
 - ✓ All interventions were provided to patient/resident and staff
 - ✓ Identified issues and/or deviations from the policy/protocol were immediately addressed and corrected, if possible
 - ✓ Event was reviewed for “*lessons learned*” and to prevent recurrence

SIR Reporting

(Review/Transmit Details)

■ Review/Transmit Details

- For users with Reviewer/Transmitter access:
 - When entering an event, following your answer to “**Did Staff Debriefing occur?**,” you will automatically be taken to the following question: “**What is the Severity Level?**”
 - When editing/updating an event that was already entered, you will need to click on Edit for question “**Did Staff Debriefing occur?**” and then click Next, in order for the Severity Level question to be prompted – (*See below*)

What is the Severity Level?

* Required

LEVEL2..... (Level 2- Moderate - Internal & Home Office communication) ▼

LEVEL1..... (Level 1 - High - Internal & Home Office communication, with telephonic notification)

LEVEL2..... (Level 2- Moderate - Internal & Home Office communication)

LEVEL3..... (Level 3 - Low - Internal communication only)

is the Severity Level?”
question

SIR Reporting

(Review/Transmit Details)

▪ Review/Transmit Details – Assigning Severity Level

- Reviewer/Transmitters need to reference the Data Dictionary – See examples of Event Types and their Risk Severity Levels as well as the Risk Severity criteria below:

AGGRESSION	S/SLANGUAG	Abusive/Obscene Language - Staff/Staff	Staff member directs abusive or obscene language towards another staff member.	3
KEYS	EMERGKEYS	Deployment of Emergency Keys	Any time emergency keys are deployed at a high or medium security facility.	2
MEDERROR	SIDEFFECT	SIDE EFFECT	Resident experienced an adverse effect in response to taking a prescribed medication.	2*
DEATHEXP	CANCER	CANCER	Death of a resident who was diagnosed with terminal cancer.	1

Risk Severity Level

Level 1 - High Severity Level - Significant events that require telephonic notification, and include both internal & Home Office communication.

Level 2 - Moderate Severity Level - Internal & Home Office Communication

Level 3 - Low Severity Level - Events that only require internal communication between staff members at the site.

NOTE:

2* means the event report should only be categorized as a Level 2 (Moderate Severity Level) and transmitted to Corporate if the event results in an injury requiring treatment beyond first aid to one of the parties involved and/or parties outside of the facility required notification of the event (e.g., Worker's Comp was called; Police was contacted because a party wanted to press charges, etc).

If not, the incident should be recorded as a Level 3 (Low Severity Level).

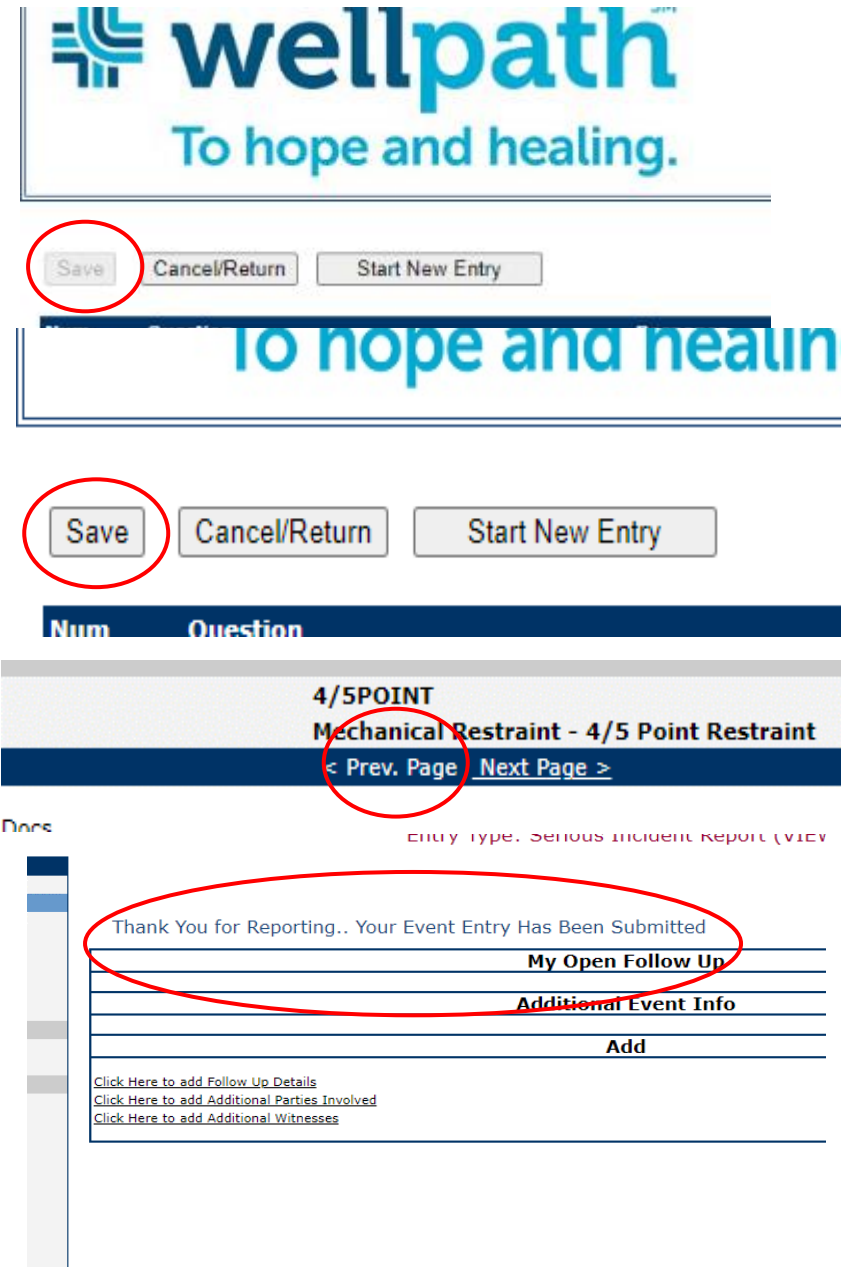

SIR Reporting

(Saving, Updating & Transmitting an Event)

■ Saving an Event

- For initial entry users

- While entering an event, the “**Save**” button at the top left corner of the screen will be grayed out
- When all required question fields have been answered, the “**Save**” button will be accessible
- If the “**Save**” button does not appear when you reach the end of the SIR questions, go back to the beginning of the SIR by clicking on “**Prev. Page**” near the bottom of the left side of the page and go through all question fields, ensuring that all were answered, until the “**Save**” button becomes accessible
- Upon clicking on the “**Save**” button, if an entry has been successfully entered the user will see the following message on the right side of the screen above the **My Open Follow Up** section: “**Thank you for Reporting...Your Event Entry Has Been Submitted.**”

The screenshot displays the Wellpath SIR Reporting interface. At the top, the Wellpath logo and tagline "To hope and healing." are visible. Below this, there are three buttons: "Save", "Cancel/Return", and "Start New Entry". The "Save" button is circled in red, indicating it is the focus of the instruction. Below the buttons, there is a table with columns "Num" and "Question". The table shows a single entry: "4/5POINT Mechanical Restraint - 4/5 Point Restraint". Below the table, there are navigation links: "< Prev. Page" and "Next Page >". The "Prev. Page" link is circled in red. Below the navigation links, there is a message: "Thank You for Reporting.. Your Event Entry Has Been Submitted". This message is circled in red. Below the message, there are sections for "My Open Follow Up", "Additional Event Info", and "Add". At the bottom, there are links: "Click Here to add Follow Up Details", "Click Here to add Additional Parties Involved", and "Click Here to add Additional Witnesses".

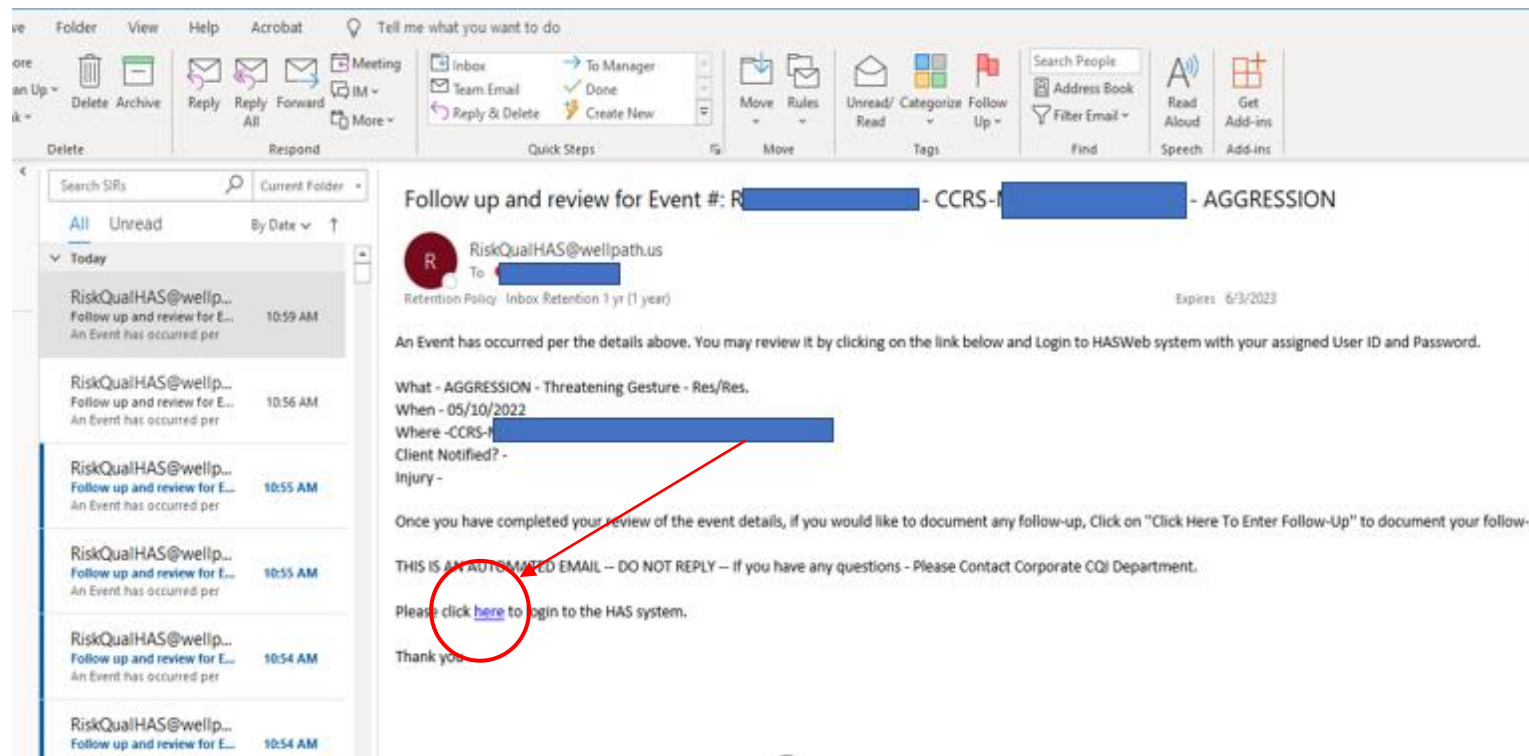

SIR Reporting

(Saving, Updating & Transmitting an Event – cont.)

■ Saving an Event (cont.)

- For initial entry users (cont.)

- An email notification of your entry will be received by all site users assigned to receive these notices from RiskQual
- Users will be able to click on the link provided in the email to directly access the event for review (*they will be taken initially to the RiskQual DTW login page and upon entering their credentials will be taken to the directly to the incident*)

■ Updating an Event

• Supervisor Users

- Users who have Supervisor rights, including Searching and Editing, will be able to review, edit, and update entries
- Most edits will allow you to save the update upon clicking next
- However, if after an edit you note that the **“Save”** button suddenly is grayed out and/or does not become accessible it means new required questions that were not in the original SIR entry were prompted by this change and need answers before you can save your update. If this occurs, be sure to go through all the question fields of the SIR until the **“Save”** button becomes accessible again, allowing you to save your edits
- When an event has been updated, RiskQual users that are supposed to receive email notifications for event updates will receive an email advising them of an update for this entry. The email notice will look the same as the one received for initial entry. Users will be able to directly access the event via email in the same manner as detailed before ([See Slide 41 for further details](#))

■ Transmitting an Event

• Reviewer/Transmitter Users

- As mentioned previously, Reviewer/Transmitters can assign a Risk Severity Level
- Once the Risk Severity Level is assigned and saved, email notification to those assigned to receive updates will receive the notice
- If an Event is assigned a Risk Severity Level of 1 or 2, Corporate users assigned to receive RiskQual email notifications will receive notice of the event entry. This will be their first notification of this event, regardless of previous entries/updates. This notification process allows for the sites to review events in detail and ensure all information is accurate and complete before it reaches Corporate staff for review and feedback

■ Follow Up Actions

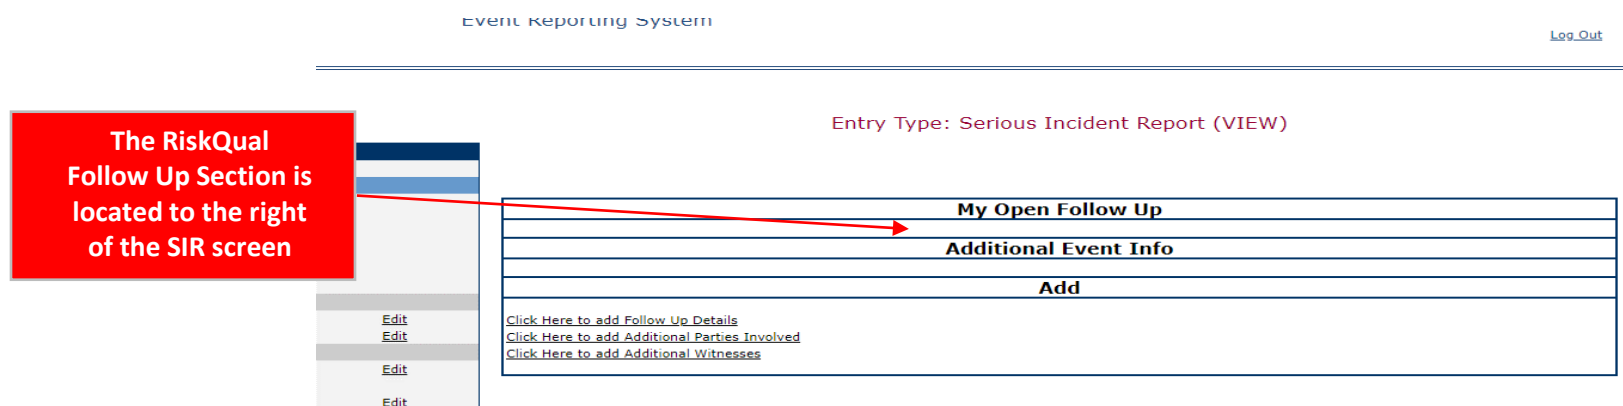

- Essential in the reporting process
- They can entail simple updates on the individual's status or involve analysis of person/incident

■ Updated/Final Outcome

- Updating depends on the timeframe of the report, the event type, and the follow-ups required by State/Agency/Client
 - **Examples of Minor Outcome Updates:** Patient admitted to hospital/ER; Patient returned from hospital/ER; DCF/Law Enforcement came, etc.
 - ✓ These should be added to an event later, if not available at time of initial reporting, as part of the original narrative or as a Follow Up Detail
 - **Examples of Major Outcome Updates:** Conducting an MR; Completion & findings of an RCA, etc.
 - ✓ These outcomes will usually be added 14-45 days after the incident, depending on the required follow-up actions and their timeframes

■ RiskQual Follow Up Details

- There are specific types of Follow Ups available for selection in RiskQual
- Each of these has its own unique template with specific questions or actions required

The screenshot displays the 'Event Reporting System' interface. At the top right, there is a 'Log Out' link. The main header indicates 'Entry Type: Serious Incident Report (VIEW)'. Below this, there is a table with three sections: 'My Open Follow Up', 'Additional Event Info', and 'Add'. The 'Add' section contains three links: 'Click Here to add Follow Up Details', 'Click Here to add Additional Parties Involved', and 'Click Here to add Additional Witnesses'. On the left side of the interface, there is a sidebar with several 'Edit' buttons. A red callout box with white text points to the 'Click Here to add Follow Up Details' link, stating: 'The RiskQual Follow Up Section is located to the right of the SIR screen'.

SIR Reporting

(Additional Event Info)

■ Additional Event Info

- In the same area where you would find the link to add Follow up Details, the user can find links for the following Additional Event Info additions:
 - **Additional Parties Involved** – This action is to add other active participants of the event not already mentioned as the Primary and Secondary parties
 - **Additional Witnesses** – This action is to add other witnesses of the event not already named in the SIR
 - **Additional Meds Involved** – This field would appear if the user identified that meds were involved, allowing the user to enter more than one medication, if needed
- Although the user is free to add this additional information in this section, it is not mandated. Instead, it is advised to name all these participants, witnesses, and/or medication in the Event Description
